Leading and Learning in the 21st Century: Engaging the 21st Century Learner

Disengaged and resistant learners don't enjoy school, don't achieve to the levels of their engaged peers, are problems for their teachers and, if not turned around, contribute to the alarming number of students who drop out of school before ever getting their high school diploma.

Join us for an intensive and extensive discussion of what Mathematics educators can do to improve student engagement in today's classrooms. And, since teacher engagement leads to student engagement, we will also explore a variety of ways in which you can support the increase of teacher engagement in your work.

Karen Hume will facilitate the discussion and activities using her book *Tuned Out: Engaging the 21st Century Learner*. This book is a practical guide to both student and teacher engagement in five key areas: Competence, Creativity, Community, Context, and Challenge. Each participant will receive a copy of *Tuned Out*.

About Karen:

Karen Hume is a well-known Canadian teacher, administrator, author, speaker, and workshop leader. The winner of three "Teacher of the Year" awards, Karen has taught all but four grades in K-12 (she especially enjoyed Grades 7 and 8), and has also been a teacher-librarian. As an administrator, Karen worked in a high-needs K-8 school and then led her district's efforts in reculturing schools to meet the needs of at-risk and struggling learners in Grades 7-12.

Karen has her M.Ed. in curriculum and teacher development, has been a member of a university research group funded to investigate the role of talk in the classroom, and is a member of the editorial board of an online action research journal.
