| Minds On... | Whole Class → Brainstorm Create a list of all the different types of taxes that they know of. Whole Class → Read Along Read pages 1 – 3 from the article 'Canadians Celebrate Tax Freedom Day on June 20,' from The Fraser Institute. Ask students to highlight key information as they read the article. Highlight types of taxes mentioned in the article that were featured in the brainstorm and add to the list other types of taxes that are mentioned in the article that may not have been raised through the brainstorm. Note: The taxes used to compute Tax Freedom Day include income taxes, property taxes, sales taxes, profit taxes, health, social security and employment taxes, import duties, license fees, taxes on the consumption of alcohol and tobacco, natural resource fees, fuel taxes, hospital taxes and a host of other levies. | If using a SMARTNOTEBOOK create each type of tax as a separate object in order to move the type of taxes into three categories later. If necessary, teach the students to "Google" efficiently. |
| Action! | Small Group → Brainstorm Pose the question to the students "Why are there taxes?" Have the students create a list and/or search on the internet for different services financed by the different levels: federal, provincial and local. Students record on BLM 2.1.1 Mathematical Process Focus/Performance Task/Checklist Observe students as they complete the task in order to assess their Connecting skills. | |
| Consolidate Debrief | Whole Class → Classification Classify types of taxation identified in Minds On that occurs for federal, provincial and local. Students share from their investigation the services that each of the levels of government is responsible for providing. | |
| <i>Exploration</i> | Home Activity or Further Classroom Consolidation Create a circle graph to illustrate the 10 categories of taxes that are used to calculate the Tax Freedom Day. Make a hypothesis of which type(s) of taxes would have altered for the Tax Freedom Day to change from last year to this year. | |

| Minds On... | Individual → Hypothesis Testing Provide students with page 4 of the article ‘Canadians Celebrate Tax Freedom Day on June 20,’ from The Fraser Institute. Students will use the information provided on the chart to test their hypothesis from Unit 2 Day 1. | Students may represent the 2006 data in a circle graph, and compare the percentage of each category of taxation to their 2007 circle graph. The key idea is to use proportional reasoning to support or negate their hypothesis. |
| Action! | Pairs → Pre-read Tax Guide Students complete the Scavenger Hunt BLM2.2.1 to become familiar with the Canada Revenue Agency General Income Tax and Benefit Guide. | |
| Consolidate Debrief | Whole Class → Discussion Discuss any missing links of the Scavenger Hunt. Post BLM2.2.2 and establish the ‘where’ for step 1: Personal Information (Page 1 of T1 General) and step 2: Miscellaneous (Page 2 of T1 General). Distribute page 1 and 2 of the T1 General Tax Form. As you discuss this page have students identify items of personal data that pertain to them now and items that do not. Students record on BLM2.2.3. Mathematical Process Focus/Observation/Mental Note Use information collected about students’ abilities to reflect in order to plan subsequent lessons. | |
| <i>Application</i> | Home Activity or Further Classroom Consolidation Identify and record on BLM2.2.4 miscellaneous information required on page 1 and 2 of the Tax Form. | Miscellaneous Information: GST/HST Elections Canada Foreign Property |

BLM2.4.2: Exploring Tax Credits

Group Members: _____

Tax Credit Assigned: _____

Instructions:

Gather relevant information about the tax credit. Your information should answer the following questions:

- Who?
For whom is the credit?
- What?
What is the purpose of the credit?
What are the features of the credit?
Is the credit a refundable or a non-refundable tax credit?
- Where?
Is the credit provincial or federal?
Where is it located on the Income Tax Form or Schedules?
- When?
When did this credit or when will this credit tax take effect?
- Why?
Why do I care as a student about this tax credit?
- How?
How do I claim this credit?

Comment [J1]: I don't know if I've changed the intention of this, but it was somewhat unclear.

Note: There is information about tax credits in The Quick Tax Instructors Guide(e.g. p121, p160), the CRA student workbook(pages 24-31 for Net Income calculations, pages 32-44 for Schedule 1 calculations)

BLM2.6.2: Completing Step 4 of filling in the Tax Return

This is the continuation of the case study started on BLM2.4.1:

Monique pays \$580/month rent. Her medical expenses have totalled \$636.25 for the year. Monique's mother has taken care of Robert during the evenings and her daytime daycare is provided at the school for a cost of \$950 for the school year.

Monique also was advised to make a small RRSP contribution of \$250. This should be entered on page 3.

Note: The tax form refers to schedule 7 (see below) Based on the instructions, schedule 7 will NOT be required in this situation.

T1-2006

RRSP Unused Contributions, Transfers, and HBP or LLP Activities

Schedule 7

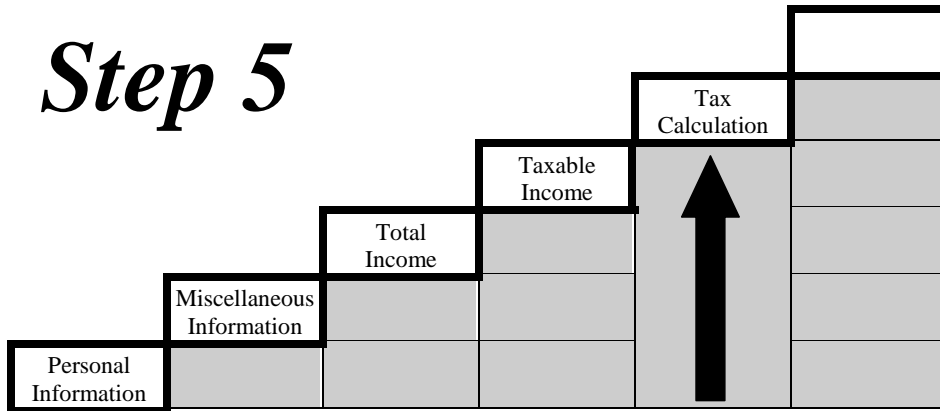

Only complete this schedule and attach it to your return when one or more of the following situations applies:

- You will not be deducting on your return for 2006 all of the unused RRSP contributions (amount B) on your "2006 RRSP Deduction Limit Statement" on your latest *Notice of Assessment*, *Notice of Reassessment*, or Form T1028, *RRSP Information for 2006*.
- You will not be deducting on your return for 2006 all of the RRSP contributions you made from March 2, 2006, to March 1, 2007.
- You have transferred to your RRSP certain amounts you included in your income.
- You are designating contributions made to your RRSP as a 2006 repayment under the Home Buyer's Plan (HBP) or the Lifelong Learning Plan (LLP).
- You withdrew funds from your RRSP in 2006 under the HBP or the LLP.

If none of these situations applies to you, do not complete this schedule. Just enter your total RRSP contributions on line 208 of your return. See line 208 in the guide for more information.

BLM2.6.3: Step 5 of filling in the Tax Return

Step 5

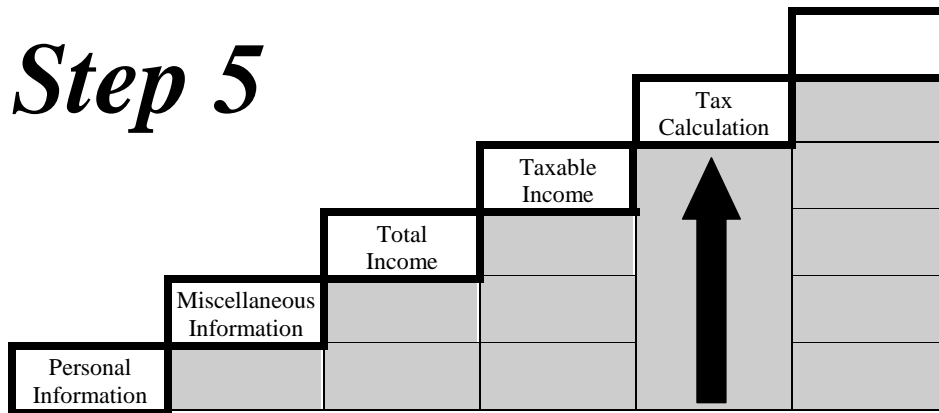

List the items that would be most appropriate for you to use to determine your federal and provincial tax credits. Indicate where that information is located on the T4 slip or which schedule would be needed to calculate its entry

BLM2.7.3: Why is the Government being so nice to Canadian taxpayers?

The government encourages Canadians to spend their money in certain ways, or to support certain endeavors. They do this by either actually SUBTRACTING the whole expense from your income before you calculate the tax that is payable, or by giving the taxpayer a non-refundable Tax Credit. Non-refundable means that if you don't actually owe them any taxes, they do not send YOU the credit amount! It can only be used to reduce the amount if you do actually end up paying taxes.

From the Tax Guide, or the work you did in class, identify three items from each group (those that are subtracted from your Total income and those that give you a tax credit), and explain why the government would want to encourage Canadians to spend money in this way.

Also, can you think of any item the government encourages which you yourself question, or which they do NOT encourage and you think they should?

BLM2.8.1 Tax Tips for Home Business

Oct. 12, 2006 01:00 AM
LINDA A. FOX
SPECIAL TO THE STAR

If you operate a small, home-based business, you are trying to get the most out of every dollar you bring in. Figuring out how to maximize tax deductions is one very important aspect of the business's financial plan.

Small, home-based businesses present a number of opportunities for income tax planning that, if not dealt with properly, can cost the owner money.

Many such businesses are operated out of the owner's home, for reasons of cost as well as avoiding a commute and being able to care for small children while still working.

The Income Tax Act specifically provides that expenses incurred for the purpose of earning income may be deducted for tax purposes, so the owner must remain on top of all the costs that are being incurred. Getting good financial advice is the key.

Chartered accountants and small-business specialist Jerry Paskowitz, a partner in Sloan Partners LLP of Thornhill, warns that many home-business costs are hidden.

"For example, rent paid for a residential apartment or the mortgage interest paid on a house may be deductible," said Paskowitz. "The criterion would be whether there is space dedicated to the operation of the business."

"Let's say the proprietor has inventory stored in a third bedroom and is also using that space to keep the business records. Customers also go to that room to see the merchandise and place orders," Paskowitz explains. "In that case, the owner would determine the portion of the home being used for business purposes as a percentage of the total space, and apply that proportion to the mortgage interest to determine the allowable expense. The same rationale would be used for other related expenses, such as maintenance costs and utilities."

Other allowable deductions would be the expense of stationery and supplies, as well as the business use of a vehicle.

One question that arises quite often is whether a business owner can employ his or her spouse," said Paskowitz. "The short answer is that any person who provides services to the business, whether related or not, can be paid. That also includes children. The consideration is that services provided should be documented and paid for at a reasonable rate. There is terrific opportunity for the unaware to miss out on legitimate claims by forgetting to compensate spouses for work performed."

When paying a family member or spouse, no tax is paid on income up to \$8,000 and those who receive the money can make RRSP contributions, which can benefit the family.

Other allowable expenses include travel, if your trip is deemed for business purposes; insurance; cellphone and land line telephone bills. Meals and entertainment expenses are restricted to 50 per cent of the amounts paid.

If the business acquires capital assets such as computer equipment, furniture and fixtures, depreciation – "capital cost allowance" in tax-speak – is deducted at rates determined by the Canada Revenue Agency, or CRA.

BLM2.8.1 Tax tips for home businesses (continued)

Some types of expenses, such as those incurred in acquiring advanced knowledge, may be treated as business expenses while some may be deemed tuition, depending on the circumstances, said Paskowitz.

“For instance, attending a certification course required by a manufacturer before being allowed to sell a particular product will be treated as a business expense, but attending a college night course to gain advance knowledge of a software program is most probably tuition,” he says. “In either case, they would be allowable deductions in the computing of taxable income.”

A final word of advice from Paskowitz is to read the related tax paperwork. “To assist in the planning, business owners and prospective owners should look at tax forms T2032 (for service businesses) and T2124 (for product-based businesses) and read the CRA guides to these forms to get an understanding of the tax treatment of home-based and small businesses.”

If you are unsure what to do, get help. Most initial consulting visits to accountancy firms are free. Do your homework, choose someone with a recognized accounting designation for assistance, and put all your questions in writing.

Just take a quick look around your home. If you have a room set aside as an office; if you have furniture and equipment, computers, phones, a car and employee relatives, chances are you have things you can write off to maximize business tax deductions
