

Name: _____

Date: _____

Piecework

1. Calculate the monthly earnings for the following employees who assemble small toys at a factory.

- *There is no base salary.*
- *They are paid a commission in terms of the number of items assembled each month.*

Employee	Number of Toys Assembled Last Month	\$2.25 For Each of the First 300 Toys	\$3.55 For Each of the Next 250 Toys	\$4.95 For Each Toy Over 550	Total Monthly Earnings
Gurpreet	578				
Mitch	412				
Sonja	549				

2. Describe the similarities and differences between the types of commission of Worksheets 3 & 4.

3. If the average monthly income of a new worker at the factory is \$1296.25, how many toys does the average new employee assemble?

4. If Sonja works 36 hours per week, find her equivalent \$/hr wage for last month. Assume that there were 4 weeks last month.
